

## SAVE-A-SWITCH™

## FEATURES and BENEFITS

- Patients have all chains at an arm's length.
- Installation ready.
- No tools required. Installs in seconds.
- Low initial cost (less than repair cost)
- Easy to see.
- Fits all standard bed rails (round to square)
- Can be used over and over (nothing to replace)
- Durable 100% nylon hook and loop (can be disinfected)
- Helps prevent against shock hazard.
- Attaches to any chain. Comes with a 48 in. white nylon string with #10 ABS balls and a ABS connector for #6,#8 or #10 ball chain.
- To prevent damage to switches , a release of 5lbs. (+/- 2lbs) is part of the design.

### How it works:

When the rail is lowered or the bed is moved. The two straps are pulled apart by the rail and are no longer secured together.
