

# Health Care Call System

## Central Equipment Enclosure Cat. 6888/8888

### Description

Jeron Central Equipment Enclosures are used in EC-300 Nurse Call Systems to house the central equipment. They support and protect the equipment, and secure the conduit.

### Equipment

The heavy gauge cabinet has a welded steel construction with a durable, baked-on beige powder coat finish. The hinged cover has a one-piece piano hinge, and a tumbler lock with offset cam. The enclosure is equipped with four threaded studs and nuts on the back of the enclosure to accept the equipment subplate for various Jeron Nurse Call Systems.
