

MMC-2 SERIES

HTX CORDSETS

DESCRIPTION

The HTX-5 series call cords are supplied with a fifteen pin plug that is compatible with MMC single and dual patient stations. The pins are gold plated for long life. Cordsets have 6.5' long cords (excepting for HTX-58 and HTX-59 which have no cords). Special length cords must be Factory quoted.

HTX-51 Pendant Cord

The HTX-51 permits patients to place calls from Bedside Stations. The cord is six and one-half feet long and is supplied with a plated clip.

HTX-55 Oxygen Tent Cordset (Pneumatic)

The HTX-55 Cordset is for use in oxygen tents or for electrical-susceptible patients. It is pneumatically actuated. It is supplied with a clip.

HTX-57 Geriatric Cordset

The HTX-57 is a pressure-sensitive cordset which will place a call when gently pressed. It is intended for patients whose fingers are bandaged, arthritic, etc. It may be actuated by elbow, knee, foot, etc. Supplied with a clip.

HTX-58 Dummy Plug

MMC Bedside Stations are designed to deliberately place a non-cancellable call whenever a cordset is not properly installed into the pillow speaker receptical. The HTX-58 is plugged in to prevent the non-cancellable call from being placed during cleaning, etc.

HTX-59 Ambulatory Plug

Like HTX-58, except with momentary call button to place calls.
