## General:

The "CALL-FOR-AID" system is designed for use in public restrooms, especially for handicapped areas, where "CALL-FOR-HELP" or emergency switches are required: Components may be purchased separately or as a kit.

---

Handicapped/Call-For-Aid kit P/N HV110

Kit contains: 1- Pull Cord Station 206-2  
1- Dome Light 302-2C

PULLCORD STATION 206-2 P/N 120606-1

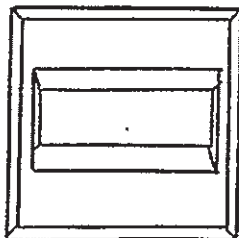

The 206-2 Emergency Pull Cord station provides emergency call placement with reset capability only at the call-initiating station.

Material: Satin Stainless Steel  
Overall Dimensions: 4-1/2"H X 2 3/4"W  
unit mounts on a single gang electrical box

PUSHBUTTON STATION 206-2S P/N 120606-24

Same as above with pushbutton instead of pull cord.

DOMELIGHT 302-2C P/N 945075-05

The 302-2C Dome Light is designed to be installed over the door(s) outside the restroom(s). Each unit contains a buzzer for an audible alarm and two lamps (bayonet type) for call indications which may be used for one or two separate areas. For two separate areas, dome light must be mounted horizontally to create a left and a right indication.

Material: Satin Stainless Steel  
Overall Dimensions: 4 1/2"H X 4 1/2"W  
Unit Mounts on a single gang electrical box.
