

EMERGENCY SWITCH STATION

206

The 206 series of Emergency Stations consists of a mechanically locking switch connected to a six foot long pull cord with pendant. All components are mounted on a single gang stainless steel face plate.

Face plate is marked "PULL FOR HELP".

Overall Dimensions: 2 1/2"W x 4 1/2"H

Mounting: Standard single gang electrical box

Toggle

ECS1: Single gang pull cord station with toggle type switch SPST

ECD1: Same as above but with DPST

206 PD

The 206PD series includes a red/LED to indicate from which station the call was placed. A diode is included to isolate switches for zoning or by floor annunciation.

Overall Dimensions: 2 3/4"W x 4 1/2"H

Mounting: Standard single gang electrical box

206 2S

Emergency lock in button on single gang plate with 4 pole switch

Options: Call place light, diode, 2 gang plate.

SP 206

The SP206 station provides multiple use as an Emergency station with an activation of an intercom speaker.

Overall Dimensions: 4 9/16"W x 4 1/2"H

Mounting: Standard two gang electrical box

SP version can have call place light and diode.
